

### **ImagineTime Hardware Requirements**

#### ***Workstation Requirements:***

- Minimum - Windows XP, or later OS with 512 MB of RAM
- Optimal - Windows XP or later with 1GB or more RAM
- Windows Vista and Windows 7 are supported
- Requires minimum 1024 x 768 screen resolution

#### ***LAN Requirements:***

- Minimum – Mapped drive on a peer-to-peer cabled network, or dedicated file server running Windows XP or later, or Linux OS.
- Better - 10/100 network connection to Windows 2003 or 2008 server.
- Optimal - 1 gigabit network connection to Windows 2003 or later server.

#### ***Terminal Server Requirements:***

- Windows 2003 or 2008 terminal server.
- Also supports Citrix server.
- In general, 15 concurrent users require about 3-4 GB of RAM at the server. Double that for 30 users. These requirements are approximations of what you will need. Please check with your network technician to confirm these estimates.

**\*\* Current service packs are required for your operating system and any installed \*\*  
Microsoft Office products.**
